"The Singles are a series of monthly treats. For each month we release a new song - not connected to the album releases - performed by a variety of artists. The songs can be - a live version of a previously recorded song - two or more artists joining by invitation or accident - a cover of an other artist's song - a marriage proposal - a song from a movie that have no other home ... basically any good reason, as long as it's a piece of music that the world needs and that it can benefit from standing on it's own feet. The songs are downloadable on all the online stores and every now and then you'll find compilations of Singles on both CD and VINYL. Release parties for the singles are more like cocktail hours - one song/one video - and are hosted by REVOLVER in Oslo the first tuesday of every month.
